Safe around roads

"One act of bad driving robbed the world of a beautiful, intelligent and caring young person."

It can be hard for you to be a:

ROAD SAFETY WEEK

Pedestrians – older children

- Children find it difficult judging the speed and distance of traffic until they're at least eight. Accidents peak around 12, as children start making independent journeys
- Children learn by doing and practising. If they're moving to a new school, help them practise the route over the holidays. Where are the safe places to cross? What should they do if they see their bus and they're on the other side of the road?
- They can be mesmerised by their mobiles, so remind them not to talk or text on their phones or listen to music while crossing the road.

SAFE ROADS FOR ALL

Everyone's life matters on roads

Driving – speed is everything when it comes to a child's chances of survival. They're 3.5 times more likely to die if hit by a car doing between 30-40 mph.

- Get your child into the habit of wearing their helmet. If you cycle as a family, remember to wear yours too
- Look out for cycle training. Many schools offer courses to help children gain practical skills.
- Keep an eye on your speed
- Keep your phone in the glove compartment so it can't distract you.
